

# ENVIRONMENTAL LEAD NEWSLETTER

January – February 2000

## UPDATES AND ANNOUNCEMENTS

Recently this agency mailed out identification cards for certified individuals. We have indicated to housing officials and other potential work contacts that we have issued these cards. These cards are required to be in the possession of the certified individuals on the work site, and may be asked for by potential clients.

If you have not received a card, you should contact this agency immediately at (502) 564-7818 #3704. In some cases we did not have a photograph of the individual or other basic information, which is required on the card.

The following individuals or companies have been removed from the listing of certified individuals since they have not renewed their certification.

### Risk Assessors:

Tammy Brock      Ralph Zillox  
James M. Crocket  
Kevin Chaplin

### Supervisors:

Ron A. Knotts  
Gino D. Arenas

### Companies:

A & O Environmental, Inc.

## Lead Hazard Company/Supervisor Issues

### What does a Lead Hazard Supervisor Do?

Although a lead-hazard supervisor does supervise workers conducting lead-hazard abatement activities, they are also responsible for preparing abatement and occupant protection plans for small projects. The supervisor is this agency's contact if questions arise at the job site, or the interpretation of the plans, etc. The supervisor is only required to be on site during worksite preparation and post lead-abatement cleanup. However, he must be within a two (2) hour contact period of time if needed at the abatement site.

### What is an abatement plan?

A "plan" for conducting the lead abatement activities which are indicated in a job specification. The plan has the elements of who, when, where and in what manner the activities are to be conducted.

### What is an occupant protection plan?

This is a plan to protect the occupants from exposure going on at the time of the abatement activities, cleanup, and storage of materials, and assurance that clearance is passed before the occupants are allowed to return into the abatement work site.

### What is clearance and why is it necessary?

Post abatement clearance is a visual and sampling by a certified inspector or risk assessor taken at the site at specific locations to assure that the environment has been cleaned in a manner to protect other remodeling or renovation work activity and/or the occupants who return to the dwelling.

### Regulatory Jurisdiction:

Neither military bases, nor other federally or state owned residential or child occupied facilities are exempt from Kentucky lead law or other regulatory requirements.

In areas where EPA, HUD and State regulations are in conflict the most stringent standards and requirements are applicable.

## INSIDE THIS ISSUE

- 1      Updates and Announcements
- 1      Lead Hazard Supervisor/Company Issues
- 2      Inspector/Risk Assessor Issues
- 2      Housing Authority Officials
- 3 – 6      Listing of Certified Individuals/companies
- 7      Training Provider Issues
- 7      Listing of Accredited Training Providers

### Editor:

Terry M. Wescott, Health Program Administrator  
Environmental Lead Program  
Division of Public Health Protection and Safety  
Department for Public Health  
275 East Main Street  
Frankfort, Kentucky 40621      (502) 564-4537

## HOUSING AUTHORITY OFFICIALS

### Repeat from last newsletter:

\*\*\*\*Note that both assessment and abatement activities require “Certification” under new HUD rules, which become effective September 2000\*\*\*\*

“Certified” means that the Kentucky Department for Public Health has determined that the individual has taken the appropriate courses, 3<sup>rd</sup> party examination and has the required experience. The individual is issued a certificate with an assigned number. In addition the individual should have a certification card in his or her possession.

### Renovation and Remodeling Activities:

\*\*\*\*The Lead-Based Paint Pre-Renovation Educational Rule has been in effect since June 1999. We continue to find that contractors, property managers, and other individuals are not complying with the Federal Rule\*\*\*\*

The rule applies to residential houses and apartments, which were built before 1978, and requires distribution of the “lead pamphlet”, and the confirmation of receipt of the pamphlet.

This is a Federal EPA Rule, and specific questions would have to be addressed by that agency. However, a summary of the requirements can be obtained by contacting this agency.

Copies of the “Protect Your Family From Lead In Your Home” pamphlet can be obtained by contacting the government printing office by phone at (202) 512-1800, by Fax at (202) 512-2233, or in writing from the Superintendent of Documents, P.O. Box 371954, Pittsburgh, Pa 15250-7954. You must use the stock reference number EPA747-K-99-001 when ordering.

## Inspector/Risk Assessor Issues

### Report Review and Evaluation

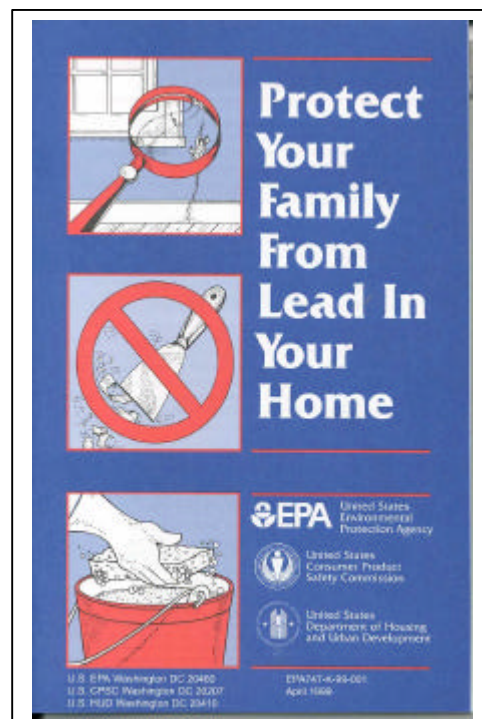

The agency staff has reviewed and evaluated several inspection, screening, and risk assessment reports which have been provided to this agency according to standards and procedures identified in 902 KAR 47:100 Sections 3,4,5.

We have found that several of the reports lacking the following required information:

- Date of Construction of Building
- XRF information including serial number

Also we have also found that some inspectors provided recommendations for lead- hazard control. A “certified inspector” can only conduct inspections. Inspection is defined as “a surface by surface examination to determine the presence of lead.”

You should thoroughly read the standard indicated in 902 KAR 47:100 since continued certification is reliant on compliance with these requirements.

## Certification Listing

### Lead-Hazard Risk Assessors

George D. Adams Exp. 10/1/01  
9305 Bova Court  
Louisville KY 40291-1486

Ted M. Audus Exp. 10/29/00

### Training Provider Issues

#### Expiration of Accreditation

The expiration of accreditation of some training courses will occur this year. The requirements for re-accreditation are indicated in 902 KAR 47:090 Section 14. Be aware that there is a time frame for re-accreditation and this must be met in order to be applicable for the reduced fee amount of \$150 per course.

#### Use of Non-EPA Model Course Materials

Although a training provider does not have to use the same format found in the EPA model curriculums, the materials used in the course must teach the same standards and procedures as required by State and Federal regulations and rules. The course must discuss EPA rules, HUD guidelines, State and any other applicable lead rules. If applicable, copies of regulations and rules should be provided to the students. The course materials must use the same terminology, definitions and testing standards used by EPA and HUD. Course content and handouts require continued updating.

Each training provider should be somewhat familiar with EPA course curriculum, **since as a part of the accreditation each principal instructor must have completed at least sixteen (16) hours of an EPA-model or departmental accredited lead-specific training course.** Although, which course is taken is not indicated, it is highly suggested the course taken is the course taught.

EPA course materials\* can be obtained from the National Technical Information Services at 5285 Port Royal Road, Springfield, Virginia 22161, phone number (703) 605-6000.

\*Some course materials are presently being updated
